

To whom it may concern, I listen to satellite radio. I choose to subscribe to xm radio because I have an abundance of formats at my fingertips. I urge you to not allow anyone to interfere with my freedom of choice. News is an important part of any broadcasting outlet, and I feel that satellite radio should not be barred or banned from ANY type of information. TheNational Association of Broadcasters should not be allowed to choose what I can or cannot choose to hear. Please reject NAB's petition 04-160.

Sincerely,

Sandra Logan
